PROJECTS

MyShelterManager *(Rails, React.js)* | live | github
Shelter management website based on ShelterManager.
- Uses Paperclip and AWS S3 to store uploaded images
- Uses Flux as the application architecture to:
  - provide visual feedback to users on Ajax requests
  - provide live search and takes user directly to result page if there is only one result

Snake *(Javascript, jQuery, CSS)* | live | github
Snake-variant inspired by the original retro arcade game
- Allows 2 players to compete against each other
- Multiple difficulty level

Chess *(Ruby)* | live | github
Ruby powered chess playable in terminal.
- Multiple levels of class inheritance to keep code DRY.
- Cursor input to select pieces and move pieces.
- Makes a recursive duplicate of the board to validate moves without modifying the game state
